

# Devalla Jaya Chandra

## Senior Business Analyst

Herndon, VA | [Djayachandra1995@gmail.com](mailto:Djayachandra1995@gmail.com) | +1-(609)-856-0205 | [LinkedIn](#)

---

### PROFESSIONAL SUMMARY

Accomplished Senior Business Analyst with **6+ years of experience** across IT, financial services, insurance, and energy utilities. Expert in end-to-end requirements delivery — authoring BRDs, RTMs, FSDs, and UAT documentation — and translating complex stakeholder needs into build-ready technical solutions. Proven track record delivering enterprise programs using ServiceNow, Azure DevOps, SAP, Power BI, and Tableau, with quantified impact: **84% Citrix group reduction · 70% reporting effort eliminated · 25% forecast accuracy uplift · 18% churn reduction · \$4MM+ program coordination.**

---

### PROFESSIONAL EXPERIENCE

#### Senior Business Analyst

Jan 2026 – Present

*Washington Gas / AltaGas · USA · Remote*

- Named Senior BA on COR47 ITAM & ServiceNow Foundations program — owned RTM across ITOM/CMDB, ServiceNow Catalog Rationalization, and HR Service Delivery workstreams across three entities (ALA, WGL, SEMCO).
- Rationalized a Citrix entitlement estate from 375 groups to 60 valid groups (84% reduction); delivered first three Sprint 1 catalog forms to vendor build on schedule.
- Authored BRD, RTM, Test Plans, and ServiceNow-to-ADO Testing Process document; maintained program RAID log using Azure DevOps and SharePoint.
- Led COR158 DR Enhancement BA delivery — authored project charter, conducted current-state gap analysis vs. AltaGas DR Plan v2.6, and supported 3-year DR investment roadmap targeting 5-day RTO baseline.
- Coordinated Cyber AI Optimization Program (~\$4MM) across four workstreams: AI detection & response, SOC modernization, secure development POC, and end user protection.
- Ran structured vendor evaluation — scored CrowdStrike, Microsoft, Cisco, and Rubrik against defined requirements for CSO-level security investment decisions.

#### Business Analyst

Jan 2025 – Dec 2025

*MetLife · USA · Remote*

- Facilitated cross-functional stakeholder workshops; produced comprehensive BRDs, FRSS, and Use Case Scenarios for enterprise technology initiatives.
- Designed Tableau KPI dashboards across business units — reducing manual reporting time by 60% and improving quarterly revenue forecasting accuracy by 25%.
- Performed statistical trend and variance analysis on customer churn data — enabling targeted retention campaigns that reduced churn by 18% YoY.
- Established credit risk model using logistic regression and survival analysis, improving loan default prediction accuracy and strengthening risk mitigation strategies.
- Delivered SAP Fiori and SAP Analytics Cloud dashboards for P&L, cash flow, and budget vs. actual analysis; facilitated UAT with detailed test cases and documentation.

#### Business Analyst

Jun 2021 – Dec 2023

*Tata Capital · India*

- Led end-to-end business transformation projects from requirements gathering through deployment, delivering measurable efficiency gains and cost savings.
- Built Power BI dashboards with SQL and Python (pandas) for real-time KPI monitoring — eliminating 70% of manual reporting effort across business units.
- Applied ARIMA and exponential smoothing models for credit loss forecasting — improving projection accuracy by 18% and enabling more precise reserve allocation.
- Utilized Bloomberg Terminal for market trend analysis — contributing to a 20% increase in portfolio returns through data-driven investment strategy.
- Reduced financial reporting errors by 15% through GAAP-compliant review of balance sheets, journal entries, and financial statements; directed Azure DevOps automation reducing manual effort by 25%.

Junior Business Analyst

Jan 2018 – May 2021

Vivma Software Inc · India

- Led stakeholder sessions to gather requirements; developed BRDs, Product Backlog documentation, and process flow diagrams across healthcare and enterprise software projects.
- Automated financial analysis using Advanced Excel (Power Query, VBA, Macros) and SAP BPC-integrated financial planning models, improving planning accuracy by 25%.
- Designed risk scoring models (logistic regression, decision trees, random forest) reducing customer default rates through targeted, data-driven interventions.
- Automated KPI dashboards via Power BI and DAX — driving corrective actions that boosted regional sales 15% in 2 quarters; achieved 30% AR/AP improvement via QuickBooks implementation.
